SEATING

2025 Brochure

The formation of Shark Seating happened at a time when the NZ Navy faced delays and rising costs from inflexible suppliers dominating a small market. There was a need for agile and cooperative suppliers offering lighter, more adaptable products and services.

At Shark Seating, our passion is deeply rooted in our mission: to significantly reduce the number of people affected by spinal injuries on boats. Central to our success is a customer- centric approach that drives our strategies for maintaining and expanding our international client base.

We recognise that our mission remains critical as long as there are customers who lack adequate protection from wave impacts. This drives our continuous efforts to innovate and improve our products, ensuring they remain accessible to all who need them.

WARRANTY & SERVICE

All shark equipment includes a **3-year global manufacturer's warranty**. To register your product and receive service updates:

1. **Scan the QR code:** Use the QR code provided to easily complete your product registration and sign up for important service updates.
2. **After warranty period:** If your product is beyond the warranty period, please contact us directly for assistance with replacement parts.

Lightweight

All shark suspensions are designed to be extremely lightweight, enhance handling, improve fuel efficiency, and reduce the overall weight of your boat.

Low Cost

Shark suspensions are priced to ensure that everyone can experience ultimate comfort and safety, regardless of their budget.

Performance

Each suspension offers extensive travel, providing a smooth and safe ride.

Non-corrosive

Shark parts are built to endure the harsh marine environment, guaranteeing your suspensions will stand the test of time.

Waterproof

Shark seats and foams are designed specifically for the water. You'll never have to worry about sitting on a wet seat or seeing damage, even from saltwater exposure.

UV Resistant

Shark seating's injection-moulded proprietary plastic blend is UV-protected to ensure your seats remain unaffected by harsh UV rays, no matter where in the world you are.

Scratch Resistant

With shark seats in demanding and harsh environments, scratch resistance is crucial to ensure your seat remains in pristine condition.

No Pinch Points

Shark suspensions enhance safety by eliminating pinch points, hard surfaces and sharp edges preventing injury to fingers or arms even if passengers or hands are under the seat.

Simplicity

Shark suspensions are self adjusting, ensuring easy maintenance and consistent comfort. The shock absorbers automatically adapt to your weight, so there's no need to manually adjust settings for the perfect ride.

Environmental Care

Our injection moulding process utilises carbon sequestration to strengthen our bioplastic leaf springs and promote sustainable production of FLEXANITE composite.

Worldwide Shipping

Shark operates a warehouse in Brussels for efficient distribution in Europe, while operations in New Zealand, the USA, and Taiwan manage global logistics.

"As manufacturer of high speed indestructible HDPE workboats we rely on a reliable, safe and economical product like shark ULTRA suspension seats to keep our customers safe and healthy. When working in a rough environment at high speeds a comfortable and practical jockey seat is a must have for any high speed boat operator. We have been using shark Ultra seats for all our open workboats for the last 3 years and we did not have any problems or service issues at all. It is a good and practical seat for a reasonable price!"

Bruno Tideman
Tideman Boats BV

"Went out in 1m swells, which for the lake is rough. Brilliant is all I can say. Forty knots head-on and we were all comfortable. Even full speed at 48 knots with no problems. Usually we are doing 30 knots and really hurting"

Alan Turia
Turangi Coast Guard, NZ

"The jockey seat has been brilliant... I would never have thought of getting such a seat before, but now I would not want to give it up even if I was in perfect health .. it is just so much safer and more comfortable than standing or sitting in anything else."

Michael Halsey
Sunshine Coast, AU

ALL CODES ARE PREFIXED WITH: NSN

Defence customers like the modularity of the shark seating system because they can customize the seats to suit any mission while maintaining NATO compliance. Swapping seat types, accessories, mount heights, restraints and track systems can be performed easily and without ever deviating from the NATO catalog.

The benefits of a modular system apply equally to dealers and boat operators who can easily upgrade or customize their seating to suit changing requirements or when moving seats from one boat to another. Whatever your need, the shark modular system has a configuration which will suit it
